SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable, production-grade MERN stack applications. Currently owning a SaaS platform serving 2,500+ outlets and 50,000+ users. Actively upskilling in Generative AI and agentic workflows — with hands-on project experience in RAG, vector search, Azure OpenAI, and document intelligence pipelines. Proficient in AI-assisted development using Claude, Cursor, and GitHub Copilot.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Ant Design

Databases: MongoDB, Mongoose, PostgreSQL, Azure AI Search (Vector Search)

AI/GenAI: Azure OpenAI, Azure Document Intelligence, RAG pipelines, vector embeddings, fine-tuning concepts

DevOps & Cloud: AWS EC2, Azure Blob Storage, Nginx, Vercel, Git, GitHub, Linux/Ubuntu

CS & System Design: RBAC, MVC, DB Query Optimization, API Rate Limiting, REST, GraphQL, JIRA

EXPERIENCE

Software Engineer

July 2024 – Present

Transerg LLP

Remote

- Own end-to-end development on a SaaS restaurant operations platform serving **2,500+ active outlets** and **50,000+ users**; diagnose and resolve production bugs ensuring high availability at scale.
- Optimized MongoDB aggregation pipelines, added compound indexes, and eliminated N+1 query patterns, **significantly reducing response times** on high-traffic analytics endpoints.
- Implemented API rate limiting and request throttling, improving system resilience and preventing abuse under peak load.
- Designed RBAC with granular permissions across multi-level user hierarchies; built template-based task workflows, user rating system, and group task creation using React, Redux Toolkit, and Ant Design.
- Led junior developers via code reviews, task distribution, sprint planning, and architecture diagramming (Miro, Mermaid).

Full Stack Developer

July 2023 – July 2024

Eveit

Remote

- Built production-ready e-commerce platforms with React.js, Next.js, and Node.js; integrated Razorpay and Shiprocket API for end-to-end payment and order management.
- Applied lazy loading and memoization (React.memo, useMemo, useCallback), improving website performance by **20%** and enhancing Core Web Vitals.
- Developed a headless CMS blog platform using React and Hygraph CMS, enabling non-technical users to independently publish content.

Junior Software Engineer

February 2023 – July 2023

Jupitice Justice Technologies Pvt. Ltd.

Chandigarh, India

- Designed MySQL schemas for blockchain transaction management; integrated multiple third-party APIs to extend platform functionality.

PROJECTS

DocuWise AI

Node.js, Express, TypeScript, React, MongoDB, Azure OpenAI, Azure Document Intelligence, Azure Blob Storage, Azure AI Search

- Built a full-stack **AI document platform** with multi-category ingestion (Resume, Invoice, General), OCR via **Azure Document Intelligence**, file storage on **Azure Blob Storage**, **RAG-based chat** (Azure OpenAI + Azure AI Search), and **multilingual translation** — all with monthly quota enforcement.
- Designed category-specific React views (resume skills, invoice line-items, AI summaries) with RTK Query, unified data model, and end-to-end error handling.

EDUCATION & CERTIFICATIONS

University of Kalyani

M.Sc. in Applied Mathematics — 82.19%

Kalyani, West Bengal

June 2019 – July 2021

University of Burdwan

B.Sc. in Mathematics

Burdwan, West Bengal

March 2019

Full-Stack Developer Bootcamp — MERN Stack & DSA | 10X Academy, Hyderabad (2022–2023)
