SUMMARY

Full-Stack Software Engineer with 3+ years of experience building scalable, production-grade MERN stack applications. Currently owning development on a SaaS platform serving 2,500+ active outlets and 50,000+ active users, with hands-on experience in DB optimization, API rate limiting, RBAC, server deployment, and team leadership. Proficient in leveraging AI-assisted development workflows — including Claude, Cursor, and GitHub Copilot — to accelerate delivery, automate debugging, and write 10x more productive, high-quality code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux Toolkit, Tailwind CSS, Bootstrap, Ant Design

Databases: MongoDB, Mongoose, PostgreSQL

APIs & Tools: RESTful APIs, GraphQL, Postman, Razorpay, Shiprocket API, Hygraph CMS

DevOps & Deployment: AWS EC2, Nginx (server setup & deployment), Vercel, Git, GitHub, GitLab, Linux/Ubuntu

CS & System Design: Data Structures & Algorithms, System Design, RBAC, MVC, DB Query Optimization, API Rate Limiting, JIRA

EXPERIENCE

Software Engineer

July 2024 – Present

Transerg LLP

Remote

- Own end-to-end development on a SaaS restaurant operations platform serving **2,500+ active outlets and 50,000+ active users**; actively diagnose and resolve **production bugs** on a live system, ensuring high availability and uninterrupted service at scale.
- Collaborate with junior developers by helping distribute tasks, participating in code reviews, and sharing best practices; involved in feature scoping discussions and cross-team delivery coordination.
- Optimized **MongoDB aggregation pipelines**, added compound indexes, and eliminated N+1 query patterns, significantly reducing response times on high-traffic analytics endpoints.
- Implemented **API rate limiting and request throttling** to protect backend services under peak load, improving system resilience and preventing abuse at scale.
- Designed **RBAC** with granular permission management across multi-level user hierarchies; built template-based task workflows, user rating system, and group task creation using React, Redux Toolkit, and Ant Design.
- Produced system architecture diagrams using Miro and Mermaid, improving team alignment; contributed to sprint planning resulting in measurable improvement in team velocity.

Full Stack Developer

July 2023 – July 2024

Eveit

Remote

- Built production-ready **e-commerce platforms** with React.js, Next.js, and Node.js, integrating **Razorpay** and **Shiprocket API** for end-to-end payment and order management.
- Applied lazy loading and memoization techniques (React.memo, useMemo, useCallback), improving website performance by **20%** and enhancing Core Web Vitals.
- Developed a **headless CMS blog platform** using React and Hygraph CMS, enabling non-technical users to independently publish and manage content.

Junior Software Engineer

February 2023 – July 2023

Jupitice Justice Technologies Pvt. Ltd.

Chandigarh, India

- Designed **MySQL schemas** for blockchain transaction management, handling dynamic user data and cryptographic materials with feature-gated activation.
- Integrated multiple **third-party APIs** to extend platform functionality and improve user experience.

EDUCATION

University of Kalyani

M.Sc. in Applied Mathematics – 82.19%

Kalyani, West Bengal, India

June 2019 – July 2021

University of Burdwan

B.Sc. in Mathematics

Burdwan, West Bengal, India

March 2019

CERTIFICATIONS & TRAINING

Full-Stack Developer Bootcamp | *MERN Stack, Data Structures & Algorithms*

10X Academy, Hyderabad | 2022–2023
